Christian Gerald Emmanuel Esquillo

Full-Stack Developer, frontend focus

Lipa City, Batangas, Philippines christianesquillo01@gmail.com christian-esquillo-portfolio.vercel.app
github.com/Christian-11a linkedin.com/in/christianesquillo

SUMMARY

Computer Science student who builds web and mobile apps end to end: React and React Native interfaces on the front, Supabase, PostgreSQL and Cloudflare Workers behind them. I care most about clear, accessible UI and I ship with tests. Looking for a frontend or full-stack web development internship.

PROJECTS

TaskBuddy · home-services marketplace, thesis — Lead frontend developer, team of 4 · 2026

Next.js, React Native, Expo, TypeScript, Supabase, PostgreSQL, Remotion

- Led the frontend of a marketplace where an ML model invites the best-matched providers to each job.
- Built most of the mobile app: client and provider flows, payments, messages and ID verification.
- Backend work in Supabase: certificate checks before hiring, fee locked at hire, Google Sign-In.
- Built the marketing website and produced a promo film and 17 how-to videos with Remotion.

Clam · Filipino-first calorie tracker, solo — clam.discipleat.workers.dev · 2026, ongoing

Expo, React Native Web, TypeScript, SQLite, Cloudflare Workers, Workers AI

- Installable web app that works offline and keeps every diary on the device in SQLite.
- Cloudflare Worker serves the app, proxies food search and runs AI photo scans without storing user data.
- Filipino food data first, barcode lookup, and health guardrails such as a minimum calorie limit.

ImagePrep · open-source image tool — imageprep.pages.dev · 2026

React, TypeScript, Vite

- Resizes and converts images in batches, entirely in the browser with no uploads.

PageKit · open-source PDF organizer — pagekit-bdy.pages.dev · 2026

React, TypeScript, pdf-lib, Playwright

- Combine, reorder, rotate and split PDF pages locally, with undo, redo and browser tests.

Amara Bakery · storefront design and build — amara-bakery-iota.vercel.app · 2026

Next.js, TypeScript, Tailwind CSS, GSAP

- Designed a warm bakery brand and built it with a full demo ordering flow and scroll animations.

SKILLS

Frontend: React, Next.js, Tailwind CSS, Motion, GSAP, Radix UI

Backend & data: Node.js, Supabase, PostgreSQL, SQLite, Cloudflare Workers

Mobile: React Native, Expo

Languages: TypeScript, JavaScript, HTML, CSS, Python

Tools & testing: Git, GitHub, Vercel, Figma, Vitest, Playwright

Practices: Accessibility, responsive design, offline-first, testing

EDUCATION

De La Salle Lipa · BS Computer Science — Expected 2027

CERTIFICATIONS

DataCamp: AI-Assisted Coding for Developers, Introduction to AI Agents, Understanding Prompt Engineering, Introduction to Python
