PROFILE

Fourth-year Computer Science student who designs and builds fast, accessible web apps with React, Next.js and TypeScript. I care about typography, motion and the small details that make an interface feel right, and I ship with tests. Looking for a frontend or web development internship.

EDUCATION

De La Salle Lipa · BS Computer Science — 4th year · Expected 2027

Thesis: TaskBuddy, a home-services marketplace with ML-based provider matching (lead frontend).

PROJECTS

TaskBuddy · Home-services marketplace (thesis) — Lead frontend developer, team of 4 · 2026

`Next.js · React Native · Expo · TypeScript · Supabase · PostgreSQL · Remotion`

- Led the frontend of a marketplace where an ML model invites the best-matched providers to each job.
- Built most of the React Native app: client and provider flows, payments, messages and verification.
- Built the marketing website and connected the admin console to the backend.
- Produced a 60 second promo film and 17 narrated how-to videos with Remotion.

ImagePrep · Open-source image tool — imageprep.pages.dev · 2026

`React · TypeScript · Vite · JSZip`

- Resizes and converts JPEG, PNG and WebP in batches, fully on the device with no uploads.
- Before and after previews, real output sizes, and one-click ZIP downloads.

PageKit · Open-source PDF organizer — pagekit-bdy.pages.dev · 2026

`React · TypeScript · pdf-lib · PDF.js · Playwright`

- Combine, reorder, rotate, split and export PDF pages locally, with full undo and redo.
- Covered by end-to-end tests in real browsers.

Amara Bakery · Storefront design and build — amara-bakery-iota.vercel.app · 2026

`Next.js · TypeScript · Tailwind CSS · GSAP · Radix UI`

- Designed a warm bakery brand with a shared token system, a demo ordering flow and a GSAP scroll story.
- Accessible dialogs, saved orders that survive reloads, and motion that respects user settings.

Personal portfolio · Design and build — christian-esquillo-portfolio.vercel.app · 2026

`Next.js 16 · React 19 · Tailwind CSS 4 · Motion · Vitest · Playwright`

- Designed and built from scratch: shareable project views, live UI demos and an animated 3D line drawing.
- Scores 100 for performance, accessibility and SEO in Lighthouse on desktop, with unit and browser tests.

SKILLS

Languages	TypeScript, JavaScript, HTML, CSS, Python
Frontend	React, Next.js, Tailwind CSS, Vite, React Router, Motion, GSAP, Radix UI
Mobile	React Native, Expo
Backend & data	Node.js, Supabase, PostgreSQL, Firebase
Tools & testing	Git, GitHub, Figma, Vercel, Cloudflare Pages, Vitest, Playwright
Practices	Responsive design, accessibility (WCAG), design systems, performance

CERTIFICATES

DataCamp: AI-Assisted Coding for Developers · Introduction to AI Agents · Understanding Prompt Engineering · Introduction to Python
